A Good-Sense Book For Sensible Planters. Those planters who wish the latest information about Seeds, presented in a straightforward, matter of fact way, will se gratified by the practical good sense videnced in Gregory's Seed Catalogue for 886. The purpose of this book is to help the planter in the choice of seeds best adapted to the conditions of his particular locality, and it probably contains descriptions of a greater variety and more new varieties of seeds, than any other cata-logue. It gives plain, useful information in place of chromos, and hard facts instead of fanciful descriptions. It is a work worthy of the reputation of the firm that publishes it, and one that cannot fail to win the approval and appreciation of all farmers and gardeners. Any one who plants seeds can obtain a copy free of postage upon application to J. J. H. Greg-ory & Son, Marbiehead, Mass., who are the oldest and largest seed growers in New England, and one of the best known firms in the entire country. Their busiess was established in 1856, and its growth has been continuous and healthy. There probably no section of the where Gregory's "Home Grown" Seeds are
